Explanation of the Grade System:

1. For the courses, in which a final examination is given, the percentage system with "100" as full grade and "60" as passing grade is usually used. If the instructor prefers, or the result of test is a paper after a thorough study on some subjects or a report of a detailed experimental investigation on some subjects, the four-level grading system (A, excellent; B, good; C, pass; D, fail) is sometimes used instead.

2. For those courses, in which no final examination is given, it is considered adequate to use a two-level grading system (Passed or Qualified and Failed) to record the quality of study.

Lanzhou University Official Transcript

Name: Wu Junfei

Gender: Male

Enrollment Year: 2019

Graduation Year: 2022

Major in: Physical Geography

Course Title	Hours	Grade	Credit
Introduction to Natural Dialectics (2011 Edition)	18	82	1
